AEROPHONES

Any instrument, if the sound is produced by means of moving air, is an aerophone. There are lots of different kinds of aerophones including all wind instruments. However, the term aerophone is not limited to wind instruments. A whip produces sound by means of moving air. It is an aerophone but not a wind instrument. A siren is also an aerophone but not a wind instrument.

Here is a collection of aerophones. We have scrambled the letters. See if you can unscramble them and identify the instruments. The instruments used are included in those listed on the bottom of this page.

Reed Instruments

Many wind instruments depend on a thin, flexible sheet called a reed to produce a musical sound. Reeds used to be always made of cane. These days they can also be made of other materials such as plastic, metal and wood.

Instruments can single-reed, double-reed or free-reed.

Air flow causes the reed to vibrate. The reed in a single-reed instrument vibrates against another surface. The reeds in a double-reed instrument vibrate against each other. A free reed vibrates within its own space.

Use your library to determine whether the following instruments are reed instruments and whether they are single-reed, double-reed or free-reed instruments.

Bagpipes
Bassoon
Cor anglais
Piccolo
Crumhorn

Worksheet 19

Name

What Instrument Am I?

I belong to the string family.
I am held between the knees.
My lowest tone is one octave lower than the viola's lowest tone.

I am a woodwind instrument.
I am held crosswise.
My sound is produced by blowing against the edge of a hole near one end of me.

I belong to the brass family.
I have a mouthpiece and bell but no valves.
I am twice as long as a trumpet and can slide from tone to tone.

I am a woodwind instrument.
I play bright, lively melodies.
I look like a flute but am only half the size and I sound an octave higher.

We belong to the percussion family.
We can be tuned and produce musical tones.
We are always referred to in the plural; there are always at least two of us used.

I am a double-reed woodwind instrument.
I have the highest voice of the reed instruments.
I can be made from wood, plastic or metal and have three main sections apart from my reed.

I am a percussion and a stringed instrument.
I have a range of more than seven octaves.
My sound is made by small hammers hitting my strings.

I am a brass instrument.
I have a mouthpiece, valves, crooks and a bell.
I have the highest voice of all the instruments in the brass family.

I am a bass, pitched brass instrument.
I do not have a slide.
I have the longest tube, deepest voice and widest bell of all the brass instruments.

I am a double-reed woodwind instrument.
My reed is joined to me by a long metal tube.
I usually play the bass parts in my family, but can also play beautiful melodies.
