- **Woodwind**
- **Brass**
- **Percussion**

## Families
- **String**
- **Woodwind**
- **Brass**
- **Percussion**
Woodwind Family

Instruments which are blown into (wind) and which were often originally made of wood. Woodwinds can then be divided into two sub-families: flutes, where air is blown across a mouthpiece and reed instruments where air causes the reeds in a mouthpiece to vibrate.

Which of the following instruments are not woodwind instruments. Cross them out.

Recorder  Flute  Oboe
Guiro  Bassoon  Sansa
Cor anglais  Bagpipes  Piccolo
Saxophone  Lute  Harmonica
Krummhorn  Jew’s harp  Clarinet

Make your own list of woodwind instruments.
Do some research to see if you can find some which are not on the above list.

Word Search

Find musical instruments reading across or down and draw circles around them. In the list below tick the box next to each name as you find it then write the family to which it belongs.

- flute
- trumpet
- drum
- viola
- trombone
- french horn
- cymbal
- clarinet
- piccolo
- cello
- tuba
- castanet
- saxophone
- oboe
- violin
- timpani
- cor anglais
- bassoon
- double bass
- gong

Worksheet 5
Musical Instruments
Brass instruments are usually made of brass but are sometimes made of other metals. Some instruments are made of brass or other metals but belong to the woodwind family.

Which of the following instruments do not belong to the family of brass instruments. Cross them out.

- French horn
- Trumpet
- Cornet
- Saxophone
- Metallophone
- Tuba
- English horn
- Trombone
- Euphonium
- Bugle
- Guitar
- Sousaphone
- Oboe
- Hunting horn
- Cymbals

Make your own list of brass instruments. Do some research to see if you can find some which are not on the above list.

- ...................................................................................................................................................
- ...................................................................................................................................................
The answers to the clues in this crossword puzzle are all names of musical instruments.

ACROSS
1. Percussion with stretched skin.
3. High pitched woodwind.
5. Brass instrument without valves.
8. Low pitched double reed woodwind.
9. Woodwind without reed, usually made of metal.
12. Mid-range double reed woodwind.
13. Common name for harmonica.
15. Brass instrument with valves, its tubing in circular coils.
16. Large deep percussion with stretched skin.

DOWN
1. Largest in the string family.
2. Single reed instrument made of brass.
4. Double reed woodwind instrument.
5. Brass instrument with valves.
7. Stringed instrument which rests on the floor whilst being played.
10. Single reed woodwind.
11. Highest pitched in the string family.
12. Percussion instrument clashed together in pairs.
14. Instrument with many strings which is not played with a bow.
Instruments which need to be hit or shaken to make a sound are called percussion instruments.

Which of the following instruments are not percussion instruments.
Cross them out.

Which percussion instruments would you usually find in a symphony orchestra?

........................................................................................................................................
........................................................................................................................................
This is the typical layout of a symphony orchestra.

Fill in the blocks of instruments according to the family to which each belongs.

Use a different colour for each family as follows...

Blue for **Percussion**  
Yellow for **Brass**  
Green for **Woodwind**  
Red for **Strings**

---

**Instruments of the orchestra**
Facts about the Orchestra

Use the terms in the column on the right to complete the details. Cross out the answers as you use them. Use each answer only once. You may need to use your dictionary.

1. The art of arranging music for an orchestra is called

Chamber Orchestra
Instrumentation
Orchestration
Conductor
Symphony
Polyphony

2. An instrumental ensemble - or a number of instruments playing together - is called a

3. A small orchestra is called a

4. The person controlling the musical performance of the orchestra is called the

5. The collection, or ensemble, of instruments chosen to play a particular composition is called the

6. Voices played together, providing melodies, rhythms and musical texture supporting each other is called

Research: Find the names of six famous orchestras.

AEROPHONES

Any instrument, if the sound is produced by means of moving air, is an aerophone. There are lots of different kinds of aerophones including all wind instruments. However, the term aerophone is not limited to wind instruments. A whip produces sound by means of moving air. It is an aerophone but not a wind instrument. A siren is also an aerophone but not a wind instrument.

Here is a collection of aerophones. We have scrambled the letters. See if you can unscramble them and identify the instruments. The instruments used are included in those listed on the bottom of this page.

Groan ........................................ Rorredc ...................................

</table>
Many wind instruments depend on a thin, flexible sheet called a reed to produce a musical sound. Reeds used to be always made of cane. These days they can also be made of other materials such as plastic, metal and wood.

Instruments can single-reed, double-reed or free-reed.

Air flow causes the reed to vibrate. The reed in a single-reed instrument vibrates against another surface. The reeds in a double-reed instrument vibrate against each other. A free reed vibrates within its own space.

Use your library to determine whether the following instruments are reed instruments and whether they are single-reed, double-reed or free-reed instruments.

</table>

Which reed instruments would you usually expect to find in a symphony orchestra?

...................................................................................................................................................
...................................................................................................................................................
...................................................................................................................................................
1) Name this instrument.

2) To which orchestral family does it belong?

3) How is a musical sound produced on it?

4) Label some of its parts (as indicated).
Membranophones

Any instrument, if the sound is produced by means of a vibrating membrane, or skin, is a membranophone.

Most drums are membranophones - and there are lots of different types of drums.

We have listed some of the properties of various types of membranophones.

See if you can label them correctly from the following group of instruments:

Friction drum      Timpani      Bass drum      Conga drum      Tambourine
Kazoo               Bongo drums  Tambour       Kettle drum     Snare drum

..........................................               The membrane of this drum is rubbed
with wet fingers or a stick.               The Dutch Rommelpot is one of these.

..........................................               Also called a Side Drum
Has strings of metal stretched across the lower head.       Produces a ‘rattling’ sound.

..........................................               Held in one hand, played with the other.
Shallow drum of a small size                   Has loose pairs of metal disks at the side.

..........................................               Known by two of the above names.
Can be tuned and is used in the orchestra.       Usually played in pairs or sets of two to four.

..........................................               They come from Cuba.
Are played in pairs.                         The players use their hands and fingers to play.

..........................................               An open tube with a hole covered by a membrane.
Changes the sound of a person’s voice.        Not a drum.
Name three instruments in the string family

Name three instruments in the woodwind family

Name three instruments in the brass family

Name three instruments in the percussion family

How is a musical sound made on a flute?

How is a musical sound made on a tuba?

How is the pitch changed on a clarinet?

How is a musical sound made on a trombone?

How is the pitch changed on a trombone?

Name two ways by which musical sounds can be made on a violin

Name two ways by which the pitch is changed on a trumpet

Which is lower in pitch, the viola or the cello?

To which family does the cor anglais belong?

Name one part that the timpani and the snare drum have in common

Name a woodwind instrument that is made of metal

Name one family of instruments usually found at the back of the orchestra

Name one family of instruments usually found at the front of the orchestra

Name the highest pitched woodwind instrument

Name the lowest pitched brass instrument
Choose an Owner

Where would these instruments be used? Who would use them?
Draw lines to match up the musical instrument to its appropriate user.
There could be several correct answers, but each instrument must match up to an owner.

Rock n Roll group ........................................ Shaker
